PROJECTS

Harmonize— Node.js, Express, PostgreSQL

Full stack application leveraging the Spotify API to automatically generate a playlist based on the listening history of a group of users.

Pokémon Clientside— jQuery, JSON

Client-side application and proof of concept that the first generation Pokemon games could be completely rebuilt with HTML, CSS, and JavaScript. This project leverages CSS grid and flexbox for layout, jQuery UI for animations, and JSON for storage.

Another Project— React, Redux, other things

The best project ever, you don't even know. Made with all of the cool new tech. Super cool. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Lorem ipsum dolor sit amet, consectetur.

'Show Me' and 'GoogleDO'— JavaScript, HTML, CSS

Entries in yearly "Hack-a-gTech" innovation competition, both placing in the top 5 of 150+. ShowMe leverages the Google Hangouts API to enable screen sharing between clients and the Google services team. GoogleDO is a teamwide task assignment and management tool.
